Cover Letter of Ryan Lacey

Dear Sir/Madam,

My name is Ryan Lacey, I am a new graduate having studied a BSc in Computer Science (Software Entrepreneurship Branch) at University College Cork (UCC). In addition, I completed a year of study of Marketing, Innovation and Technology in Dublin City University (DCU).

Please find a copy of my resume attached. In summary, my academic achievements consist of:

 - Overall, a 2.1 grade
 - Class Academic Representative
 - Class Entertainment Representative
 - Vice Captain of Indoor Football Team

I feel your company would be a place for me to grow and learn as well as bringing my unique input and ideas which I have accrued during my time in UCC, DCU and TeamWork. My entrepreneurship studies allow me to think like an owner and bring talents that others applying may not possess as the software entrepreneurship branch of computer science is a rare one with few graduates.

In depth information about my education and grades can be found at https://ryanlacey.ie/ which is a work in progress. A Highlight of my academic achievements is found in the table below.

I look forward to your response.

Ryan
